

Notice of Chateau® Bath Collection SKU Transitions

Dear Valued Partner,

As part of our continued commitment to meeting evolving homeowner preferences and supporting our wholesale partners, the Chateau collection is being refreshed with updated styling and enhanced features—while **maintaining** its well-established design and accessible price point.

What's changing

- Select Chateau bathroom faucets, bath, and shower products will transition to new model numbers (SKUs).
- These updates reflect a refreshed Chateau design and, in many cases, offering a more streamlined appearance and easier installation.
- Core performance, quality, and overall product positioning remain consistent, with changes driven primarily by model number updates.

Legacy SKU availability

Current (legacy) Chateau SKUs will continue to be available and supported through August 1, 2026. Availability of these legacy model numbers is guaranteed only through this date, after which they may be discontinued and no longer orderable.

To avoid disruption, we recommend planning future orders, specifications, and project commitments using the new Chateau model numbers wherever possible.

Cross-reference information

To support a smooth and accurate transition, an attached Chateau SKU Transition Cross-Reference Sheet is included. This document details legacy model numbers alongside their corresponding new SKUs, key product attributes, and list pricing alignment.

Please reference this cross sheet when placing orders or updating internal systems to ensure continuity.

What you need to do

- Begin updating item files, pricing systems, and specifications to reflect the new Chateau SKUs.
- Contact your Moen representative for guidance on specific product transitions or inventory planning.

Thank you for your continued partnership and for supporting the Moen brand as it evolves to meet today's market needs.

Sincerely,
Chris Reberk
Vice President-Field Sales

Visit [moen.com](https://www.moen.com)
for additional information.

We are committed to our wholesale partners and meeting your needs and those of your customers. As part of that commitment, we're elevating the Chateau bathroom collection to reflect a more updated, style-forward look that reflects what homeowners want today while maintaining an accessible price point.

The Chateau bathroom collection is our longest-standing product line and has established brand recognition. This style refresh will maintain some of the classic aspects of the Chateau design while incorporating new elements relevant to today's style preferences.

In addition to an updated aesthetic, this collection will feature a single-handle bathroom faucet that will require only one hole for installation. This new feature gives the faucet a more elevated style with a slimmer base for quicker installation.

Will there be new product SKUs in the Chateau Bathroom Collection Refresh or will the original SKUs remain?

New product SKUs within the Chateau bathroom collection will be available for bathroom faucets and shower and bath fixtures. The original product SKUs will be available through 2026. Please refer to the following pages for more information on SKU transition.
